Gichner Shelter Systems Achieves AS9100 Quality Management Certification

Dallastown, PA - July 2, 2013 – Gichner Shelter Systems, a Kratos company, announced today that it has recently received AS 9100:2009 certification applicable to the design and manufacture of mobile electronic enclosures and tactical shelter systems. AS9100 certification is a highly respected quality management standard written for the defense and aerospace industries to ensure the safety and reliability of products. This addition to the company's existing ISO 9001:2008 certified quality program serves as an example of Gichner's ongoing continuous improvement process and demonstrates the company's commitment to meeting customer expectations.

About Gichner Shelter Systems

Gichner Shelter Systems, a Kratos company, is the industry leader in the design, engineering, manufacturing, integration, modification, testing, and repair of tactical shelters, modular containers, and custom enclosures. Gichner has over 44 years of experience in providing mission-critical products and services to every branch of the United States Armed Forces and its allies, leading defense prime contractors, and various commercial markets. The turn-key shelter and containerized systems protect military personnel, electronics, and other cargo during transport and operation in some of the world's most challenging environments.
